Topic: De-extinction

Pre-discussion questions. Answer briefly. Use only the space provided.

1) If you were planning a project to de-extinct a new species to win the Jurassic Park X Prize, what are two problems that could prevent your success? Do you expect the development of new technologies in the future that remove these barriers?

2) What is one prominent current de-extinction project? Give the specifics of their approach.

3) What is an argument against the de-extinction movement? (An argument *other* than that is "Playing God" or that some "Jurassic Park" situation will result.) Do you think it is valid?

4) What de-extinction would you most like to see in your lifetime (none is a valid answer)?
