

Name: _____ EID: _____

Topic: Human Enhancement

Pre-discussion questions. Answer briefly. Use only the space provided.

- 1) What may be a side effect of a human enhancement being generally available and believed to be safe when it may be used to improve work productivity or the effectiveness of a soldier?
(See pages 14-15 of the Royal Academy report and point 4 of the Lin article.)

- 2) What are some ethical issues raised by the Eyeborg project and/or Google Glass?
Explain at least two and give your stance on them.

- 3) Find a website or article about a type of human enhancement that we did not talk about in class. Give a citation, briefly explain what it's for, and describe the state of the technology.

- 4) What kind of human enhancement would you consider for yourself?
You can invent a type that doesn't currently exist.
