Topic #1: Dual-Use Research

Pre-discussion questions. Answer briefly. Use only the space provided.

1) What is dual-use research? Give a brief definition.

- 2) Which of the four case studies did you pick?
- 3) What was the original motivation of the scientists doing the research that you picked?
- 4) Briefly, describe what the researchers did.

5) Why was this research considered dual-use?

- 6) Do you think that there should have been any restrictions on performing this research or on publishing the results? (Yes or No and a brief explanation.)
- 7) Optional: Are there any other examples of dual-use research that you'd like to discuss?
